WELCOME · PIR®

Welcome to PIR®

Psychedelics In Recovery™: seven stops from "I have no GitHub account" to "I read, I answer, and my helper reads with me"

For a newcomer, and for the AI helper beside them. Every slide points at a real page; the deck only shows the order to open them in. Nothing here asks you to type a command. Members: your helper's own welcome is WELCOME-FOR-YOUR-HELPER.md in the members' home (it opens only for signed-in members).

Who this is for, and how to read it

- **You**, if you have just been invited to PIR®, or are about to be.
- **Your helper** (Claude, ChatGPT, Codex, Littlebird, any of them), which reads the same pages you do, never more than you can.
- Every slide points at a real page. The deck shows the **order**; the pages hold the detail.

> Read it once top to bottom. After that, jump to the stop you need. Everything PIR® writes wears these four shades, so you can tell whose page it is before you read a word.

Anonymity first

- Never connect a person's **name, face, voice or handle** to recovery, to a meeting, or to this fellowship, unless they have chosen to share it publicly themselves.
- People appear by **first name and last initial**, and only those in visible service.
- Never put anyone's recovery, sponsor relationship, private messages, or personal, medical or legal history into a repository, a proposal or a chat with a helper that writes to one.
- **No secrets, ever.** No password or key in a chat or a file; the secret scan stops one that slips through.

> If you are not sure whether something may be shared, it may not, yet. Ask first.

The path at a glance

	Stop	What you leave with
1	Your first hour	your own account, two-factor sign-in, the invitation accepted
2	Five words	repository, branch, pull request, issue, merge
3	Proposals	how an idea asks for a decision, and where yours is waiting
4	Procedures	how an approved thing is done, step by step
5	The reading room, and your helper	where members read, and how a helper reads with you
6	How a change travels	rehearsal, Promote, live, the public twin
7	How to answer	the right door for a yes, a question or a request

1 Your first hour

	Step	You should see
	Sign up at `github.com/signup` with **your own** email; **you type your own password**	your empty dashboard
	Turn on two-factor sign-in; keep the recovery codes with important papers	"Two-factor authentication is enabled"
	Send your **username** (never the password) to the Tech Committee (type `/github` in PIR®'s Discord)	an invitation by email, or on the bell icon
	Click **Join**	PIR® under your profile's Organizations

> Nobody needs your password or a sign-in code: not a steward, not a friend, not a helper. Invitations go to your username.

The full procedure is **SOP-COM-001 "New to GitHub: your first hour"**: PIR®'s copy is in the procedures (members read it now; it reaches the public procedures with the next sync), and the family's copy is public in my-template.

2 Five words, and you can find your way

	Word	Means
	Repository	a folder that remembers every change and who made it
	Branch	one line of that history: `main` is the live copy, `preview` the rehearsal
	Pull request	a change asking to move from one branch to another, with a place to comment
	Issue	a conversation thread: the easiest way to ask or answer
	Merge	accepting a pull request so the change lands; a person with the role does it

You never need to type a branch command. You read, you comment, and you say yes or no.

3 Proposals: *should we?*

1. **TL;DR**: five lines, the only part you have to read.
2. **What is offered**: how things are today, beside what is proposed.
3. **Decisions log**: what was chosen, when, and by whom. Yours stay blank until you choose.
4. **Asks**: usually none, sometimes one.
5. **Sources, and what could not be confirmed**: folded away, never hidden.

Each proposal is a **PDF for your eyes** and the **markdown it was made from** for your helper's. Org-wide proposals live in psychedelicsinrecovery/proposals (members) on their way to the Board's inbox; each committee keeps its own. Start with **000 Start here**.

> ♡ **How PIR® decides:** committees for their own service, the Board for PIR®'s money, name and legal standing; group conscience and the Traditions first, each of us guided by a Higher Power as we understand it.

4 Procedures: *this is how we do it now*

- Named `SOP-<Department>-<ID>-<name>`: `SOP-OPS-001` is the first operations procedure.
- A **draft** until the officers tag an approved version; the tag is the approval.
- Each one opens with a badge row in **PIR®'s colour**, puts an icon beside each idea and a diagram where a picture explains the mechanism, and is also a PDF.

Start with	Says
SOP-COM-001	your first hour (stop 1, in full)
SOP-OPS-001	how a change travels (stop 6, in full)
SOP-GOV-002	how GitHub collaboration works here: teams, issues, pull requests, Pages

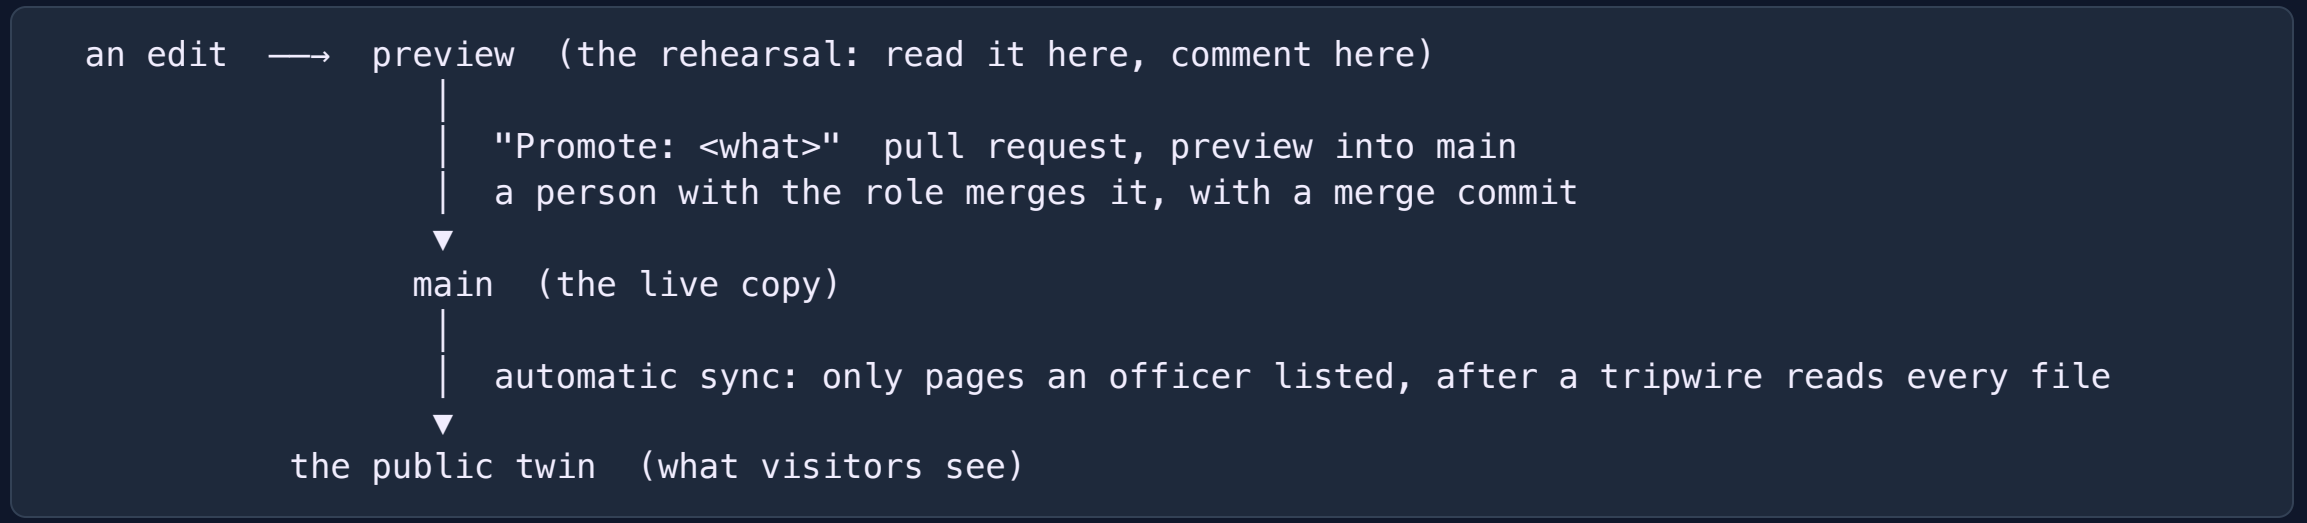

The procedures visitors may read: ops-standard-operating-procedures-public. Members read all of them, drafts included, in ops-standard-operating-procedures.

5 The reading room, and your helper

- The reading room gathers what members read: proposals, procedures and decks, each a page and a PDF. Open psychedelicsinrecovery/reading-room while signed in.
- A **404** there means "not yet in the readers team" or "signed out", not "broken": ask the Tech Committee (type `/github` in PIR®'s Discord).
- What is ready for visitors also appears in the **public room**, psychedelicsinrecovery.github.io/reading-room-public, no account needed; it links back to the members' room.
- **Your helper** reads the same pages once you connect it with your permission, never more than you can. Point it at the markdown, not the PDF.

> A good first question for your helper: "*Read 000 Start here and tell me, in five lines, what is waiting for my answer.*"

6 How a change travels

- **Merge, never squash**, so every author's name and every helper's signature survives.
- **A helper opens the Promote; a person merges it.** Helpers never merge.
- A page that is not listed never leaves the private repository, on any branch.

7 How to answer

You want to…	Do this
say yes, no, or "not yet" to a proposal	open an **issue** titled with its number, or ask a steward to note it in the decisions log
comment on a change before it goes live	comment on the **Promote** pull request
ask about a procedure	open an issue in the procedures repository, naming the SOP
let your helper draft an answer	let it draft; **you** read it and post it under your name
get access, or more of it	ask the Tech Committee (type `/github` in PIR®'s Discord)

> There is no wrong door. A question in the wrong place gets moved, not lost.

Where to start

You are…	Open
brand new to GitHub	**SOP-COM-001** (the family's public copy)
a member with an account	**000 Start here** in proposals
looking for what to read	the public room, then the members' room
an AI helper	the repository's `AGENTS.md`, then **SOP-OPS-002** (helpers open pull requests; people merge)
stuck anywhere	the Tech Committee (type `/github` in PIR®'s Discord)

Questions go where the work is: an issue on the repository, or a comment on the Promote. Access: type `/github` in PIR®'s Discord or use the web helpdesk and say "*reading room, please*"; ONBOARDING.md shows two-factor login and connecting a helper.
